# VISITING COMMITTEE AND OFFICERS

FOR THE YEAR 1899.

---

## Committee:

ALDERMAN C. H. LOW, *Chairman.*  
HERBERT ASHMAN, Esq., *Mayor.*  
ALDERMAN J. HANCOCKE WATHEN.  
GEORGE PEARSON, Esq.  
W. A. LATHAM, Esq.  
C. R. HANCOCK, Esq.  
JOHN BOYD, Esq.  
W. A. TODD, Esq.  
JOHN CURLE, Esq.  
A. J. SMITH, Esq.  
R. C. STEPHENS, Esq.

## Officers:

HARRY A. BENHAM, M.D., *Medical Superintendent.*  
J. VINCENT BLACHFORD, M.D., *1st Assistant Medical Officer.*  
ARTHUR LAUNCELOT FLEMMING, M.R.C.S., L.R.C.P.,  
*2nd Assistant Medical Officer.*  
THE REV. JAMES FOUNTAINE, M.A., *Chaplain.*  
D. TRAVERS BURGESS, *Clerk to the Visiting Committee.*  
ARTHUR ORME, *Clerk and Steward.*

*To the Council of the City and County of Bristol.*

---

The Thirty-Eighth Annual Report  
OF  
THE VISITING COMMITTEE  
OF THE  
LUNATIC ASYLUM FOR THE CITY AND COUNTY  
OF BRISTOL.

---

YOUR Committee report that during the past year the condition of the patients has been satisfactory, and the Asylum efficiently maintained.

The number of patients in the Asylum on the 31st of December last was 773; viz., 375 males and 398 females. Of these 731, viz., 345 males and 386 females, were chargeable to the City and County of Bristol; 13, viz., 2 males and 11 females, were private patients; 10, viz., 9 males and 1 female, were out-County patients; and 19 were male patients received under contract with the Asylums Committee of the London County Council. The highest number resident at any one time in the year was 787; viz., 385 male and 402 female patients.

In addition to the before-mentioned 731 patients chargeable to the City and County of Bristol, there were on the 31st

December 53 female patients so chargeable, boarded in the County of Gloucester Asylum.

The extensions of the Asylum buildings sanctioned by the Council on the 11th of May, 1897, are rapidly approaching completion, and it is hoped that part will be ready for occupation early in the Autumn. This will enable the patients now boarded at Gloucester to be received into the Asylum. Your Committee are again pleased to be able to state that, owing to the excellent arrangements made by the Superintendent, the building operations have not materially interfered with the work of the Asylum.

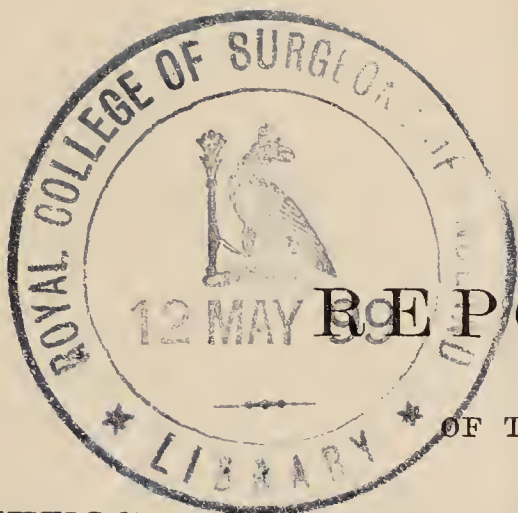

Two of the Commissioners visited the Asylum on the 20th of July last, and a copy of their report is submitted herewith. The Annual Report of the Medical Superintendent and of the Chaplain, and the Statement of Accounts, are also submitted.

Your Committee desire to express their high appreciation of the manner in which the duties of the Medical Superintendent and the Staff have been performed during the past year.

CHAS. HOSKINS LOW,  
*Chairman.*

THE COUNCIL HOUSE, BRISTOL,  
*7th January, 1899.*

# REPORT OF THE VISITING COMMISSIONERS IN LUNACY.

---

CITY LUNATIC ASYLUM,

*20th July, 1898.*

The progress of the new buildings on the female side of this Asylum is unfortunately interrupted by a strike of the masons; but the roof is on, and ready for slating, of a considerable portion. We trust that the work now at a standstill may soon be resumed.

We have inspected all the wards and other departments, and are glad to report most favourably of the state in which we find them. The dormitories of No. 4 Male Ward have been decorated throughout, and those of No. 5, over them, are now in the hands of painters and paperers. All the wards look bright and fresh, and great neatness is everywhere observable. The beds and the bedding, which to-day is arranged for weekly inspection, are clean and properly attended to. We are pleased to observe, too, that much progress has been made in staining and waxing the floor, so that they may be kept in order by dry rubbing.

The patients, of whom there are 771 on the books, and 770 now in the Asylum, one being on trial, have been all seen by us. A few complaints, evidently the outcome of delusion, were made to us; and a woman had a black eye, which she said had been caused by a nurse, but her statements were so varied and incoherent that no reliance could be placed on them. It is

supposed that she struck herself against some part of her bed at night. We were satisfied with the personal condition and state of dress of the patients in each division.

About six hundred patients were seen by us at dinner in the hall. The meal consisted of ham, with beans, potatoes and bread, and was evidently liked, and the behaviour of the patients was good. We think a musical grace, in which the patients should join, might well be introduced instead of the hortatory grace now pronounced by one of the attendants.

The 771 patients are divided into 372 males and 399 females. Twenty-nine of the males are chargeable to the county of London, 2 males to London parishes, and 2 females to other out-City Unions; but there are 56 Bristol female patients boarded out in the Gloucester Asylum. Fifteen patients belong to the private class.

Since the visit paid on the 17th November last, 186 patients have been admitted: 48 discharged or removed, of whom 45 had recovered; and 46 have died.

The recovery rate, calculated as usual, was in 1897 39·48 per cent., and the death rate 9·84 per cent.

According to the return last made to our office, the Asylum (irrespective of the additions in progress) has accommodation for 391 males and 400 females, so that there would appear to be vacancies for 20 males and one female. As there are 56 females to be brought in from Gloucester, and as the admission will no doubt rapidly increase owing to the large additions to the city population, we think it not out of place to call attention to the fact that the accommodation which will be afforded by the present extension (which doubtless will be the last) will ere long be absorbed, so that it will be prudent in the city authorities to provide in good time for the wants of the future.

The 46 deaths, 41 of which, or 89 per cent., were followed by autopsy, were mostly due to natural and ordinary causes. One,

however, was the result of colitis, and one of ulceration and apparently spontaneous rupture of the bladder. Phthisis accounted for only 4·3 per cent. of them; but 34 per cent. were the result of pneumonia and œdema of the lungs.

In three instances inquests were held. In one, where a man was found to have accidentally sustained the fracture of two ribs; in another, in which suffocation followed the regurgitation of food in an epileptic fit; and in a third, in which a dislocation of the scapula in an old man had been sustained before admission. These cases were all fully inquired into by our Board at the time. Bedsores existed in only 1·3 per cent. of the deaths, and only one was found in the patients, eight in number only, whom we to-day saw in bed.

Turning to the usual subjects of inquiry, we learn that 55 per cent. of the patients usually attend chapel; 56 per cent. the appointed entertainments; 31 per cent. walk weekly or oftener beyond the Asylum Estate; 30 per cent. daily outside the airing courts, to which only 5·8 per cent. are confined for exercise who are physically incapable of going beyond. We find, too, that 71 per cent. of the men, and 69 per cent. of the women, are usefully employed, about one-half as ward helpers.

The epileptics are 15 per cent., the general paralytics 3 per cent., and the patients considered actively suicidal are 2·6 per cent. of the whole number of patients. Only two casualties resulting in fracture of bones, but not fatal, occurred since the last visit. Neither mechanical restraint nor seclusion has been employed since then. No zymotic or epidemic disease has appeared in the Asylum, and the general health is good.

The Staff continues to be adequate. In the male division there is an attendant to  $11\frac{1}{4}$  patients, and in the female one to  $11\frac{2}{5}$  for day duty, and three men and four women are employed in night supervision.

According to the attendants' reports for last night, only 14 patients or 1·8 per cent. wetted their beds or bedding.

Eighteen per cent. of the entire staff of attendants have not yet been here a year; but 20 per cent. count over five years' service.

Dr. Benham is away for his holiday; but Drs. Blachford and Thurnam, who are temporarily assisted by Dr. Bullen, have afforded us all necessary information. The medical records are properly kept. A General Index of the cases would be very useful.

# The Thirty-eighth Annual Report

## OF

# THE MEDICAL SUPERINTENDENT.

1898.

*To the Visiting Committee of the Bristol Lunatic Asylum.*

*4th February, 1899.*

GENTLEMEN,

I have the honour to submit to you the Thirty-eighth Annual Report, which, together with the Statistical Tables annexed, will give an account of the changes which have taken place in the Asylum during the past year.

The admissions, re-admissions, discharges and deaths have been as follows :—

	MALES.			FEMALES.		
	Private.	Pauper.	Total.	Private.	Pauper.	Total.
On the Books Jan. 1st, 1898 ...	4	369	373	10	368	378
Admitted in 1898 ... ..	5	119	124	3	98	101
Re-admitted in 1898 ... ..	0	10	10	0	14	14
Discharged :						
Recovered ... ..	1	32	33	1	46	47
Relieved ... ..	1	2	3	0	10	10
Not Improved ... ..	0	0	0	0	0	0
Removed to other Asylums ...	0	49	49	0	6	6
Died ... ..	2	45	47	1	31	32
Transferred from Private to Pauper List ... ..	3	0	3	0	0	0
Remaining Dec. 31st, 1898 ...	2	373	375	11	387	398
Highest number Resident ...	4	381	385	12	390	402
Average number Resident ...	3	369	372	11	384	395

Comparison of  
Numbers.

On comparing the foregoing table with the similar one contained in the last annual report, it will be seen that there is an increase of 25 in the number admitted and re-admitted; an increase of 42 in the total number under treatment, of 35 in the average number resident, and of 22 remaining at the end of the year.

Extension of  
Boundaries.

In consequence of the enlargement of the Boundaries, 28 male patients who had become chargeable to the City were in February received here from the Gloucester County Asylum at Wotton; whilst 53 female patients still remain in that institution owing to the want of accommodation in this Asylum; but these patients will, on the completion of the new buildings now in course of erection, be removed here.

There are still 25 male patients in the Asylum from the unions under the control of the London County Council.

Admissions.

The admissions during the year from the City have been 216, made up as follows: 101 males and 115 females, being an increase of 21 males and 37 females as compared with 1897.

For your information I append a table showing the number of cases, excluding boarders, admitted during the past five years:

		Males.	Females.	Total.
1894	...	68	77	145
1895	...	66	70	136
1896	...	88	94	182
1897	...	80	78	158
1898	...	101	115	216

It will thus be seen that the admissions for this year show an increase of over 25 per cent. upon the previous years, the average number for the five years being 168. This increase is due to the larger population from which patients are drawn, and for which accommodation has now to be provided; and has materially increased the work and responsibility of the medical

staff and the staff generally, while the accommodation for so many new admissions, all of whom at first require special supervision and precautions for their safety, has been severely taxed. This pressure, so far as the females are concerned, will be relieved upon the completion of the new buildings at present in course of construction, and which, I hope, will be completed and ready for occupation in a few months. With regard to the males, you have still power to extend the buildings to accommodate 59 more patients; such extension when carried out will enable you to provide for 450 males, together with 550 females, making a total of 1,000 patients, the limit which the Commissioners in Lunacy have sanctioned buildings for on the present site, and for which the new administrative department was designed. It will soon be necessary for you to consider the advisability of carrying out this addition, as the increase in the admissions, which will certainly become greater year by year as the population grows, will at no distant date absorb your present available space. The unfavourable character of the admissions which in the past annual reports I have commented upon, still continues and has become more accentuated, and I trust that now the enlarged City has been constituted one Union some speedy way will be found to provide suitable quarters for those helpless and incurable cases which are now sent here solely because there is no other place to receive them. Some provision for this class of cases is urgently needed.

I give you below a few details as to the admissions referred to :

In 1895 there were admitted 13 cases over 65 years of age.

„ 1896	„	22	„	„
„ 1897	„	24	„	„
„ 1898	„	45	„	„

The last year showing an increase of over 50 per cent. of these aged patients, the general admissions having increased by 25 per cent. only.

The number of patients in the Asylum on December 31st was 773, which includes all for whom provision has to be made, with the exception of those still remaining at the Gloucester County Asylum, whilst it includes the 25 boarders already referred to as being received from the London unions, 12 private patients who are maintained at the expense of their friends, and 1 patient who is chargeable to the prison commissioners.

Recoveries.

The percentage of recoveries on admissions during the past three years is as follows :

1896.			1897.			1898.		
Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.
26·0	37·0	31·5	35·44	41·03	37·34	31·13	40·87	34·63

The recoveries for this year, it will be seen, were slightly lower than last year, but compare favourably with 1896.

Other discharges.

In compiling this percentage, I have not included the patients received from the Gloucester Asylum, or the boarders from the London unions.

In addition to the 80 patients who were discharged as recovered, 68 other patients left the asylum; viz., 41 male patients received as boarders from other asylums and who have been sent home again, 14 transfers to other asylums, 10 discharged into the union workhouse, and 3 handed over to the care of friends.

Deaths.

The number of deaths during the year was 79, comprising 47 males and 32 females, the percentage on the number of resident patients being 10·30, of which 12·63 were males and 8·10 females. This is slightly higher than last year, when the percentage of deaths was 9·84. I desire to draw your careful attention to the fact that 19 of the deaths occurred amongst patients who had been admitted less than one month, and 16

more within three months of their reception. These two numbers represent nearly one half of the total deaths during the year.

The Coroner held 3 inquests ; in each instance a verdict was Inquests. given in accordance with the medical testimony.

The medical staff have made 71 *post-mortem* examinations, Post-mortems. being 90 per cent. upon the deaths for the year.

In the annual report to the Commissioners in Lunacy it was Curable cases. shown that 7 males and 12 females present a reasonable prospect of recovery.

The work ward and dormitories 4 and 5 have been re- Improvements. decorated, the centre servants' quarters painted, the floors of the day rooms and dormitories have been stained and varnished, the levelling and cultivation of the more recently acquired land has been continued, and various other alterations and improvements effected.

I have to report that fairly good progress has been made New buildings. with the works in connection with the new extension, notwithstanding a dispute in the building trade which delayed operations for some weeks. A portion of the new buildings is now roofed in, and it is confidently hoped that some part will be ready for occupation before the end of the summer. The execution of the work has necessitated the provision of temporary accommodation for the steward and other members of the central staff whose offices are now in process of construction. Owing to the presence of a large number of workmen and others, it has been found necessary to take additional precautions for the safety of the patients, but notwithstanding the inconvenience this has involved, I am happy to state that so far no accident has happened.

Negotiations are in progress with the Guardians of the Acquisition of land by exchange. Bristol Union for an exchange of lands abutting upon the Asylum Estate, and should these end satisfactorily, which I

trust will be the case, the employment of those patients capable of doing gardening and other outdoor work will be greatly facilitated; it will also free us from the probability, owing to the increasingly urban character of our surroundings, of our soon being inconvenienced by the erection of buildings on land adjoining, which would materially interfere with the proper management of the asylum and the safety and comfort of the patients.

St. John  
Ambulance  
Classes, &c.

The classes in connection with the St. John Ambulance Association have been continued, and several of the staff have obtained certificates during the year. All the charge attendants and nurses, as well as some who have not yet attained to that responsible position, have passed the three examinations of the Society, and also hold the certificate of the Medico-Psychological Association; this is not only creditable to our nursing staff, but it also shows the care and attention with which my medical colleagues have conducted the training classes necessary to secure such a satisfactory result.

General health.

The general health of the establishment has been good, and no epidemic has broken out during the year. A sporadic case of enteric fever occurred; one of the nurses being the sufferer. She made a good recovery. Careful investigation failed to reveal the source of the infection, which was probably contracted whilst she was absent from the asylum.

Changes in  
staff.

I have to report the retirement on a well-earned pension of Miss Fanny Stroud, who for over 21 years had faithfully performed the duties of head nurse; her place was filled by Miss M. P. Dunn, who occupied the position of deputy head nurse at the asylum of the City of Exeter. In November last Dr. Thurnam resigned his appointment as assistant medical officer to engage in private practice, the vacancy being filled by the election of Dr. A. L. Flemming, of the Bristol Royal Infirmary, who has entered upon his duties. In the autumn of last year Dr. F. E. Rainsford, one of our former assistant

medical officers, was appointed medical superintendent of an asylum in Ireland.

To my colleague, Dr. Blachford, as well as to the other officers and the staff generally, my sincere thanks are due for the assistance they have rendered me during the year, which from many causes has been a peculiarly arduous and trying one.

In conclusion, Gentlemen, I beg to thank you most heartily for the confidence and support you have always accorded me.

I am, Gentlemen,

Your obedient Servant,

HARRY A. BENHAM, M.D.,

*Medical Superintendent.*

---

# CHAPLAIN'S REPORT.

---

*To the Visiting Committee of the Bristol Lunatic Asylum.*

*December 31st, 1898.*

GENTLEMEN,

I have the honour of submitting to you the Report of the Chaplain for the past year.

Services have been held in the Chapel, on Sundays at 10.30 a.m. and 3 p.m.; and on Good Friday at 10.30 a.m. and 6 p.m. The average number of patients present has been: Males, 176; Females, 202; total, 378. Holy Communion has been publicly administered six times; and on week-days prayers have said each morning in the Dining Hall, and afterwards the Wards regularly visited. The service on the evening of Ascension Day, and the afternoon of Sunday, October 30th, had to be omitted on account of rain. Since August 14th, 1881, when the Chapel was opened, to the present time, there have been twenty-one occasions on which, owing to the weather, it could not be used. This probably is not more than may be expected to occur again in a similar period, yet it by no means accurately represents the number who, from time to time, are prevented, either by wet or threatening weather, from attending the services. But a still greater disadvantage in having the Chapel so far from the main building is, that service in the evening, which in many ways is more desirable than in the afternoon, and would, I know, be preferred by the patients, is—except on rare occasions—impossible; though I hope when the new Dining Hall is completed, this drawback may be partially remedied.

The Library contains sufficient books for present use, but a considerable addition will be required when the new Wards are opened. In my last Report I mentioned a suggestion of the Commissioners in Lunacy, that books "new" or "in good condition," instead of "old and well-worn" ones, should be issued in the acute wards. I have endeavoured to carry out their wishes, but regret that the experiment has been a complete failure. The "new" books met with such drastic treatment as to be speedily reduced to even a worse condition than the "old and well-worn ones" to which the Commissioners in Lunacy took exception. I have therefore thought it right to discontinue any further issue of "new" books to the acute wards until the matter had been laid before your Committee and I receive your instructions thereon.

I remain, Gentlemen,

Your obedient Servant,

JAMES FOUNTAINE, M.A.,

*Chaplain.*
